## Past Technology from Abydos?

Abydos, the Seti I Temple. Ancient Egyptian temple wall carvings of what? Well, what looks to our eyes like modern military vehicles: a helicopter, tank, jet aircraft, and what some suggest is a satellite dish and submarine.

Top third: a profile of a helicopter, complete with rotary blades?

Bottom third: the profile of a modern jet aircraft?

Photo's taken from the ground looking up about 25 feet at 60 degree angle.
