Dramatic increase in pro sports adverse events since the vaccines rolled out

Nobody can explain that. Some poo-poo these events saying that they happen all the time. True, they do. But not at this rate. Something happened in 2021 that changed things by a lot. Can you guess?

Four young international soccer stars died this week after suffering a sudden heart attack.

Update 12/22/21: Twitter says all these events of athletes collapsing or dying are due to dehydration and overheating... in winter. I'm serious. [Check this out.](#)

12/22/21:

Athlete collapses/deaths following vaccination

I recently received an email from one of my followers on athlete collapses and deaths that was quite comprehensive. I've written extensively about this before. Note the number of deaths change as the vaccines are rolled out and athletes are forced to finally take them. See a difference in the number of reports per month...

First, take a look at this video posted by my friend Robert Malone:

 **Robert W Malone, MD**
@RWMaloneMD

Safe and effective? Are these the vaccines that you want to have mandated for injection into your children, California parents?
Let's go Gavin!

Now, in the comments of that tweet, you'll see people say that "these events happen all the time." True, they do. For example, [this death of Piermario Morosini](#) that happened in 2012.

But they don't happen at this rate. No way. That's the thing nobody can explain. And it only started after the vaccines rolled out. And with very few exceptions, only to vaccinated players (which isn't surprising since most all players are forced to take the jab).

Here's another [video of athletes falling on the field](#).

Chaman: A player died of a heart attack during a football match

October 28, 2021 · Capital Mail · 0 Comments

A local club player died of a heart attack during a match at the All Balochistan Deputy Commissioner's Cup football tournament in Chaman.

A match was going on between Raziq Football Club Chaman and Millat Club in a provincial level football tournament in Chaman. A 25-year-old player of Raziq Club Muhammad Islam died of a heart attack during the match.

A beautiful video of a lake and mountains. 3m04s

World I Video

The vaccine advocates find all of this super-irritating. They have no rational excuse on this. They can't use ad hominem attacks. They can't use goofball hand waving arguments. Nothing explains what everyone is observing.

All of these cases have been properly reported and are documented. No mentions (except one case) of vaccinations since the press doesn't want to create vaccine hesitancy. But the numbers speak for themselves.

60X increase in event rate

The numbers (as documented below) shows **that there have been more "events" over a recent 4 month period than in over 20 years**, which is more than a 60-fold increase in event rate.

All of these are in full public view so there is no "reporting bias" involved. And the numbers are big enough that nobody can say "oh, that's just statistical noise." Not a chance. It's just too hard to explain. This is why there are articles like these:

German News Agency Tracks 75 Prominent Athletes Suddenly Dead Of Heart Attacks After COVID Vax

Replying to @WichitaChiefSam

Unfortunately, young healthy athletes are dying at a rate that we have never seen before.

People are obviously making a correlation.

diariodevallarta.com
More than 75 athletes "suddenly" died in 5 months • Diario de Vallarta...
There are already more than 75 athletes "suddenly" deceased in the last 5 months. Since mid-2021 there has been a high number.

We have a very clear mechanism of action and we have overwhelming confirmation from the VAERS data that these vaccines are super dangerous and cause cardiovascular and neurological severe adverse events at a very high rate. Nothing else can compare to the vaccines when we talk about heart damage. So if you believe these events really did happen (they are in plain sight after all), then you must ascribe them to the vaccine since there is nothing else all these people have in common that could cause such an extreme elevation of events.

Also, the [Jessica Rose myocarditis paper](#) that was unethically “temporarily” removed by Elsevier over the objection of the Editor of the journal and in violation of all known scientific protocols? **Well, her paper had a very clear conclusion: the heart damage wasn’t confined to 16 year olds. It has a long tail.** In other words, it can affect people of all ages, not just teenage boys. That’s what they don’t want you to know.

So now you know... the peer-reviewed science says that the heart damage isn’t limited to teenage boys. They are still unethically suppressing this as of Nov. 13, 2021.

So there is a smoking gun for the damage done to these athletes: the vaccine.

None of these players had COVID at the time of the event since they are all tested.

If it isn’t the vaccines causing the heart damage, then what is causing all of these events to happen at such a high rate?

Here’s an email I just got from Terrance Viso:

I’ve been watching Football/Soccer for over 30 years and I can only remember 2 players collapsing previously with heart complications, both of which were undiagnosed genetic defects.

One of these players unfortunately died and the other was saved by the good fortune of having a leading London based cardiologist sitting in the crowd just feet from where he collapsed. The doctor rushed onto the field and performed life saving treatment.

Now the landscape has changed.

These events are happening on what appears to be a weekly basis.

This article lists and names the staggering numbers of athletes being taken ill with heart complications 🙄

USA, 14-year-old soccer player Ava Azzopardi collapses in a coma

USA, 12 year old Jayson Kidd collapsed during basketball practice and died

Dehydration and overheating in the winter?

See my article on the [dehydration and overheating in the winter](#) theory.

Post pandemic stress disorder?

See my [article on PPSD](#).

Cannabis use disorder (CUD) to the rescue?

Citing no evidence whatsoever, the pro-vaccine people assert that it is due to [cannabis use disorder](#). This could cause a 7% spike in the number of cases!

Just one tiny little problem... we're talking a rate elevated by **6,428%, not 7%**.

So even with the CUD theory, we still have a 6421% increase to explain.

Whoops!

It's not just athletes that are affected

It's everyone. VAERS has been showing this since January 2021. But the pro-

vax community says it is junk data when it isn't. Since most people don't know about VAERS, they believe the so-called "fact checkers."

And there are stories like these:

Ely Writes The Truth Patrol · 22 hr ago

I just heard from a cardiologist who stated that since the vaccine rollout, he has seen a 100X increase in cases of myocarditis or pericarditis. These monsters (big pharma, politicians and MSM) are killing people. Totally unconscionable to suppress this information, all for a vaccine that doesn't work.
