

Exclusive: Proof that Israel found serious safety problems with the COVID vaccines then deliberately covered it up

Israel didn't start to gather safety data until a year into the vaccine program. They gathered 6 months worth of data and found that the vaccines weren't safe so they lied to the world about it.

Steve Kirsch
Sep 2

262

Dr. Sharon Alroy-Preis, the Health Ministry's head of public services and a top COVID adviser to the Israeli government, has no problem withholding vital safety information about the COVID vaccines to make them appear to be safe. Why didn't they release the original presentation made by the safety team? There needs to be an investigation ASAP into what happened, but the head of the MoH, Nitzan Horowitz, isn't calling for one. Is he corrupt too?

[Substack](#) is the home for great writing

The key facts in a nutshell:

1. The Israeli health authority knew the vaccines were harming people: the side effects of the vaccine are neither mild nor short term. In fact, in 65% of the neurological cases that mentioned duration, the symptoms are all on-going.
2. They also established causality: the side effects were caused by the vaccine. This is something no one else had been able to establish before.
3. They don't know how serious the harm is because they only looked at the data for the top five categories. Cardiovascular was #6. So they have only looked at a fraction of the data.
4. The researchers **do not know the prevalence of these serious side effects** because they were just provided with the numerator, not the denominator (similar to VAERS).
5. The Israeli authorities deliberately covered up the safety issues and hid it from the world, issuing a false report essentially saying "there is nothing new to see here folks, move along."
6. As of September 4, 2022 no one is being held accountable and everyone is ignoring this bombshell story:
 1. There is a press blackout on coverage in Israel of this. The Israel media refuses to even look at the evidence.
 2. Nobody in Israel is being held accountable for this corruption. There isn't even an investigation.
 3. Nobody in the worldwide medical community is speaking out about the corruption either despite the fact that it affects people everywhere in the world.
 4. There is no coverage of this in any worldwide mainstream media.
 5. No public official, public health official, or mainstream media anywhere in the world is even calling for an investigation, nobody wants to see the original expert report, and nobody wants to see the safety data they gathered.
 6. We have the full video and we have the slides that were presented; use the

[Contact Me link](#) if you are a health authority and want to see it before it is released to the public.

7. This isn't surprising that they ignore this. All negative data on the vaccine is ignored. For example, when I discovered [that young Canadian doctors were dying at a more than 12X normal after the second booster](#), the Canadian Medical Association, whose job it is to to be an advocate for the health of doctors, refused to comment. I sent five requests and they ignored all requests. They should change their website to say that they are an advocate for the drug companies, not the health of doctors.

Specifically:

1. The Israel Ministry of Health (MoH) took 18 months from the launch date of the vaccine before they looked at the COVID vaccine safety data to see what it said.
2. They only started collecting safety data in December 2021, one year after rolling out the vaccines to the public. Few people knew this.
3. In December 2021, they tasked an outside expert panel led by Prof. Mati Berkowitz, a leading Israeli expert on pharmacology and toxicology from Asaf Harofe hospital, to examine the safety data they collected over the next 6 months (from early December to the end of May, 2022).
4. The panel presented their findings to MoH personnel on or about Jun 6, 2022 in a Zoom call that was secretly recorded. They found that the COVID vaccines were much more dangerous to people than the world authorities admitted. They found serious adverse events that were never disclosed by Pfizer or any world government. These adverse events were also not found to be short term as the public was told.
5. **They also determined causality**, something no other world health authority has ever been willing to do (because other governments never looked at the data either). Causality was both obvious and easy to prove using the re-challenge data that was collected (you can't do this using the US VAERS data, for example).
6. In short, the panel determined that the government was misleading the people of Israel.
7. We still don't know the whole extent of how dangerous the vaccines are because

the outside team only looked at the top 5 most frequently cited events.

8. Both the Israeli authorities and scientists analyzing the Ministry of Health (MoH) data acted to cover up the harms by releasing a fabricated report to the public to make the vaccine look perfectly safe and claim that there was nothing wrong..
9. It is only thanks to the efforts of one courageous individual who released the recording of the full Zoom meeting between the MoH and their expert panel that we now know what was said at that meeting and what the data actually showed. Otherwise the world would still be in the dark.
10. Leaders of our “trusted institutions” all over the world said absolutely nothing after the news broke on August 20, 2022. This suggests that there is widespread corruption in the medical community, government agencies, among public health officials, the mainstream media, and social media companies worldwide: they will not acknowledge any event that goes against the mainstream narrative.
11. This is a level of corruption that is unprecedented. The atrocities here are clear cut. Everyone should be speaking out and calling for a full investigation and fully evaluating the safety data collected by the Israel government.

What you should do

The three most important things you can do to put a stop to these dangerous vaccines are:

1. Read this article including the recommended links in the [References section](#).
2. Share this article with as many people as you know (e.g., share on all your social media accounts now)
3. Please subscribe to my Substack so I can keep you informed of developments. The greater the collective reach of people who are challenging the false narrative, the faster the truth will come out. It's absolutely free to subscribe.

Executive Summary

The Israeli Ministry of Health (MoH) was informed by their own hand-selected outside expert group headed by Prof. Mati Berkowitz that the COVID vaccines are not as safe as the MoH had been claiming to the Israeli people. It was just the opposite: instead of mild, short term events, the events were serious and long-lasting. For neurological side effects, in 65% of the cases, these did not go away at all ([start watching this video at 2:30](#); the 65% is at 3:09) and the researchers admitted they had no clue if they would ever go away.

Instead of admitting their mistake, the MoH covered it up by [issuing a report that distorted the expert report](#).

In addition, the experts also effectively covered it up by saying nothing when this happened. They sat by idly while the MoH misrepresented the data. It appears that everyone involved was so intimidated that they felt that they had to bury the truth, even when it can cost lives.

The news finally broke to the public on August 20 that the government hadn't been monitoring adverse reactions for a year and then, after they finally gathered the adverse safety data, that they deliberately manipulated the data to make the vaccine look safe when it wasn't. You'd think there would be major outrage at the violation of the public trust. But there was nothing. No reaction. Dr. Sharon Alroy-Preis, the Health Ministry's head of public services and a top COVID adviser to the Israeli government, issued no public statement. That's stunning.

This suggests that she and the others in her organization who knew about this were in on the cover-up. The Israeli people should demand that they be fired and criminally prosecuted.

In addition, the current Minister of Health, Nitzan Horowitz, is doing nothing. Why isn't he calling for an investigation? He should be fired as well. Or is corruption of science OK with the Israeli government?

Finally, how deep does the corruption go? Will any Israeli mainstream media cover this story? Why not? Will any member of the Israeli parliament call for an investigation? Will any member of the executive branch call for an investigation?

It appears to me that they are all bought off by the drug companies. Am I wrong?

This is a story of corruption, pure and simple.

There is no way to put a positive spin on this. Anyone in power who is not calling for an investigation and heads to roll is just as corrupt as the people who engaged in the original cover-up of the safety report.

This story is the “smoking gun” we’ve been waiting for: an official government agency was caught on tape as having received a damaging report from scientists and then deliberately lied to the public about it.

The response to this story has been crickets so far

The Israeli press (which is heavily state controlled) refused to go near the story; they wouldn’t even reply when contacted about the story. They do not want to see any of the evidence.

At the time I am writing this (September 2 and 3), only one news outlet, GB News in the UK, has covered it.

It is up to us to force our medical, health, and political leaders worldwide to take a stand on what happened. Will they condemn it or will they ignore it?

Every mainstream medical leader should be saying that what the MoH did is wrong and calling for an immediate investigation into the safety of the vaccines. We should be able to see the full presentation of the expert panel and their report. And the safety data should be released to the public like the VAERS data is.

But look at what happened: they aren’t condemning what happened and they aren’t asking for the report or the data. They are staying silent... as if it didn’t happen.

They are all basically saying, “It is OK for a government to not monitor vaccine safety for 12 months, and then, after 6 months of safety monitoring and clear evidence of harm, deliberately misrepresenting the safety data to the public.”

Introduction

It turns out the Israeli government never had a vaccine safety monitoring system in

place when they launched the COVID vaccines in December, 2020.

Finally, in December of 2021, more than a year into the vaccination program, they decided to fix that defect. They started collecting safety data from that point until the end of May 2022. They then tasked an outside research group headed by a top Israeli scientist to analyze the data.

The report came back that the side effects were not mild and short lasting as was represented to the Israeli people. **The data was clear that the side-effects were serious and long-lasting (sometimes with no end in sight).**

In short, the data showed that the government, which wasn't monitoring for safety like they claimed, lied to the people of Israel. Also, it's now clear that Dr. Sharon Alroy-Preis lied to the outside committee of the FDA about the Israeli safety monitoring.

The Ministry of Health (MOH) concealed the safety report for 2 months, then issued a deceptive public report to make the vaccine look safe. This Sunday, Sept 4, they will "ask" the vaccine safety committee to recommend the 5th dose (the combo vax) for 60+. This is corrupt. They are hiding the safety data from the public and they know it.

It took 2 months for the MOH to distort the findings and present it to the public to make it look like the COVID vaccines were safe.

Nobody knew that someone was secretly recording the meeting between the outside researchers and the MoH

Nobody knew that the June meeting between the researchers and the MoH was being secretly recorded.

Apparently, there was an honest person at the meeting and so when the MoH didn't act in a way that protected the public, the recording was leaked to the press.

In the 80 minute recording, one of the researchers said, "We'll have to think medical-legal – how to present our findings to avoid lawsuits."

After bits of the recording were leaked to the press, none of the Israeli media would cover the story. In fact, only one news outlet in the world, GB News in the UK, was

willing to cover it. Watch [this video of the GB News interview by Neil Oliver which happened on August 20, 2022](#).

Fox News was notified but declined to cover it (apparently because their advertising contracts with Pfizer prohibits them from covering any negative news about the vaccines).

The whole scam was fully exposed to the public on Sept 1, 2022 in this [Tweet \(10 messages long\)](#) from [Yaffa Shir-Raz](#) who is an honest journalist living in Israel.

I found out about it when Retsef Levi forwarded me the tweet to my WhatsApp (since I'm permanently banned from Twitter for speaking out about how unsafe the vaccines are). My reaction was swift... I started drafting this article within minutes after reading that tweet.

The tweet discusses the techniques that were used to distort the researchers' findings:

Yaffa Shir-Raz
@YaffaRaz

🇮🇱 In a leaked video, a research team commissioned by the Israeli MoH warns: "We'll have to think medical-legal – how to present our findings to avoid lawsuits. Why? Because of quite a few side effects we said: 'OK, it exists and reports exist, BUT STILL GET VACCINATED'".

If twitter takes down that tweet thread, I have a copy of the video and the full tweet which I will publish if needed.

Causality of new adverse events was proven by the outside team

In addition, new significant adverse events were identified and causality was established

in areas where the researchers weren't aware of any issues (such as neurological problems where there wasn't even a survey question asking about these; it was detected in the free-form fields).

Additional points

The outside team was hired by the Ministry of Health.

The meeting with the MoH was early June in front of a senior leader in the MoH who is in charge of adverse event monitoring.

The MoH officials did not share the findings with the MoH advisory committee when several weeks later it met to discuss the approval of the vaccine to babies and 5th booster to adults.

Dr. Alroy-Preis is #2 in the MOH. She is heading the formal collaboration between Israel and Pfizer. She meets with Pfizer regularly and writes papers with them. She is also responsible for all the COVID 19 policies in Israel.

The things they hid include:

1. The fact that, in most cases, these effects did not resolve quickly (in some cases lasting over a year)
2. The proof that the vaccine caused the events
3. The actual rates; they manipulated the rates by dividing the number of reports by all the doses, hiding the fact that they had the system for 6 months and only one HMO (15 percent of population reported). This makes the denominator huge and the numerator small which masks the significance.

How could this corruption happen?

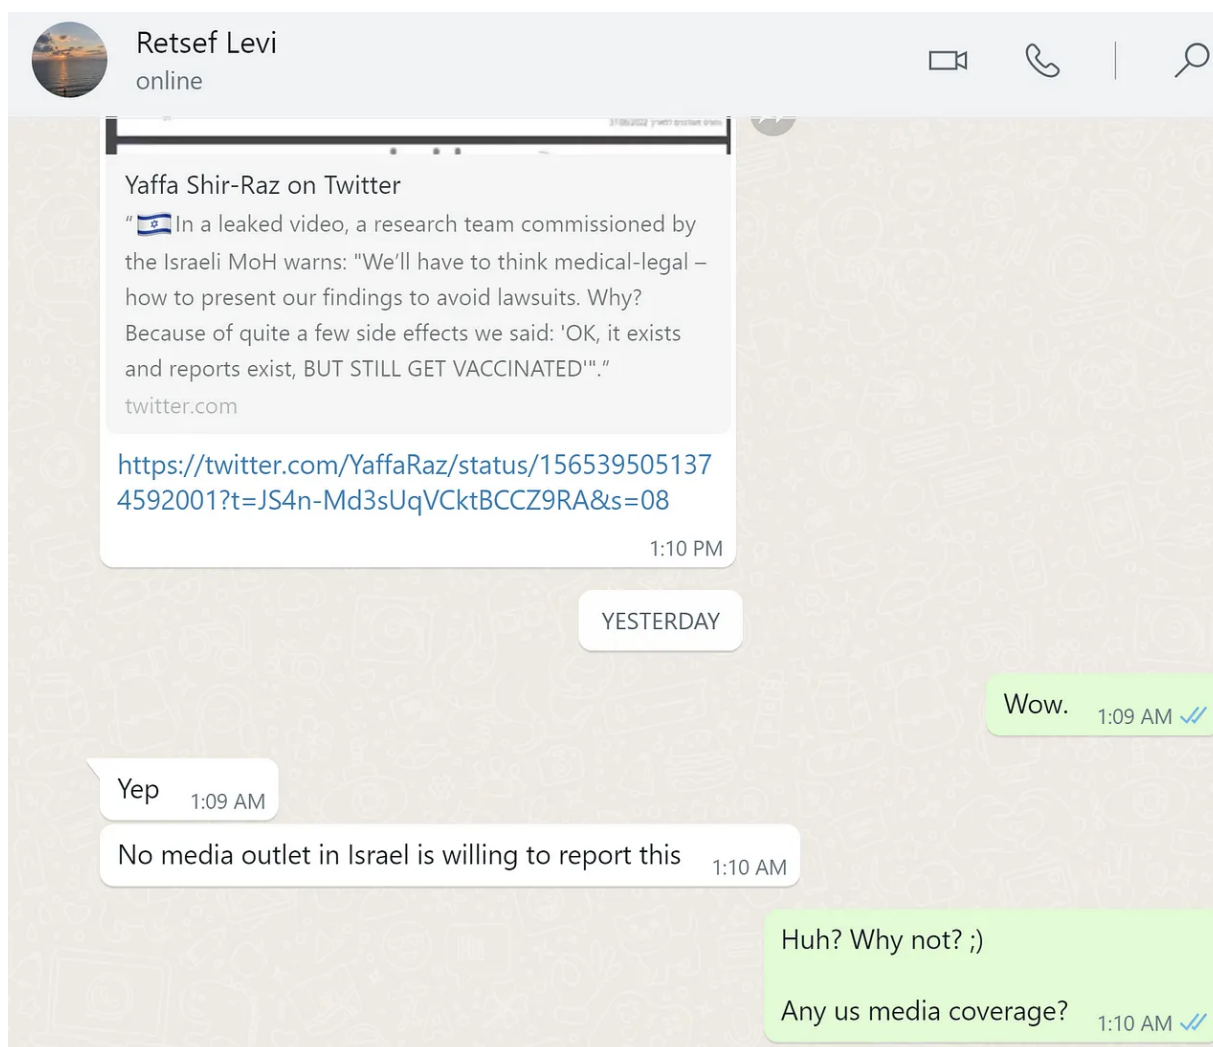

See [this article on "How did the MoH become Pfizer's agent?"](#) for how the corruption happens, but briefly it is because government officials are misled into thinking the vaccine is the only way out so they sign an agreement that makes pushing the vaccines a high priority and safety issues a low priority.

Here is another [article about the Israel-Pfizer contract](#).

'What is more concerning is the response of the Ministry of Health'

Prof Retsef Levi discusses the possible side effects of the Pfizer Covid vaccine, and the political response in Israel to questions about them.

10:09 PM · Aug 20, 2022 · Twitter Media Studio

417 Retweets 41 Quote Tweets 912 Likes

6. [This 4 minute video exposing the MoH report](#) which shows what the scientists actually said at the secret meeting. The scientists proved Pfizer lied to the FDA about the side effects. This video is only 4 minutes long and everyone should watch this. It has the statements showing that in 65% of the neurological cases,

the problems didn't resolve.

7. This [one minute clip from the Zoom call](#) shows the researchers requesting that Sharon be informed. There is assurance from the MoH attendees that they will make this happen.
8. This [two minute clip](#) shows Dr. Sharon Alroy-Preis assuring the public the vaccines are safe for women juxtaposed with the video of the researchers saying the vaccines are causing damage to women's reproductive organs that in some cases doesn't end. They are also pointing out that re-challenge results in the same problem coming back which is evidence of causality, especially when it happens in many patients. Remember, the researchers didn't know they were being recorded. They would have never said this if they knew they were on camera.
9. The public [MoH report](#) that essentially said "nothing to see here folks, move along."
10. **We have the full video of the meeting** between the scientists and the MoH officials has not been released publicly... yet. This provides an opportunity for the MoH officials to come forward on their own and admit what happened. Yaffa's tweet (above) has the info that was sent to the media. **We also have a copy of the slides that were presented at the meeting.** Use the [Contact Me link](#) if you are a health authority (doctor, academic, press, public health official) and want to see it before we release it to the public.

These references are only on this particular story of course. There are now over a thousand of articles in the peer-reviewed published scientific journals showing the vaccines are not as safe as claimed. See [this article for a summary of the evidence](#).

We are only seeing the tip of the iceberg right now

Keep in mind that the researchers ONLY analyzed the 5 most commonly reported serious adverse events and they found new things Pfizer didn't know about.

They excluded the most severe cases and gave them to another committee to examine.

Cardiovascular events were #6 most prevalent so we don't have any data on those since they weren't analyzed.

And the study didn't even include cases of hospitalization - which is the role of another committee to examine.

So the current analysis is just the tip of the iceberg.

VAERS shows [thousands of symptoms](#) that are elevated by these vaccines compared to normal.

There is a lot more that has not yet been surfaced to the public. There is honest research going on in Israel that is being ignored.

For example, did you know that according to an analysis of data from the MoH, the COVID vaccine kills 40 times more old people than it saves?

Dr. Herve Seligmann works at the Emerging Infectious and Tropical Diseases Research Unit, Faculty of Medicine, Aix-Marseille University, Marseille, France. He is of Israeli-Luxembourg nationality.

Using Israel MoH data, Haim Yative and Dr. Seligmann, Israeli researchers, found that the COVID-19 vaccine killed **40 times (40x) the amount of elderly people than the disease would have** and 260 times more younger people than would have died from the virus in a 3 week period shortly after the shots.

See:

1. [Israeli Health Ministry data: Pfizer Vaccine Killed 'About 40 Times More Elderly than the Disease Itself would have Killed'](#)
2. [Vaccination in Israel: Challenging mortality figures?](#)
3. [The uncovering of the vaccination data in Israel reveals a frightening picture](#)

Other things of note

1. The Israeli press is heavily controlled. Yaffa was fired from the biggest newspaper in Israel a year ago, after working there for 20 years. Her crime? She wrote some articles the MoH did not like. So it's not surprising that the press in Israel avoided covering this story. It is only going to make a difference if everyone who reads this article shares it on social media.

2. The expert group found side-effects not listed by Pfizer (new signals), including neurological AEs, back pain, and GI problems, especially in kids. Since the group only looked at the top 5 most prevalent side effects, it's really troubling that they found anything new. This really isn't much of a surprise as the VAERS data, which is independent of the Israeli data, shows the same thing.
3. **Causality:** they found many cases of re-challenge - recurrence or worsening of a side effect following repeated doses within the same individual - which the head researcher stresses, increases the chances of causality "from possible to definite." So it is interesting that these researchers were easily able to determine causality when nobody else in the "mainstream medical world" was able to. Of course, the "misinformation spreaders" realized that the VAERS data was saying this back in early 2021 due to dose dependency of the symptoms.
4. The only person who finally tweeted something was the husband of Sharon AlroyPreis. He basically smeared Yaffa. This actually makes sense because when you are unable to attack the merits of an argument, the proper approach is either to censor the attacker or engage in ad hominem attacks.

A comment from one of my readers in Israel

Consider [this comment](#):

I'm Israeli and I've been saying what you wrote (to myself and on a few Israeli facebook accounts) for **quite a long time now**. I'm disgusted with the heads of our ministry of health that are in charge of dealing with the Corona crisis. I'm disgusted with people like Sharon Alroy-Preis who testified in front of the FDA experts committee like a groupie or cheerleader of Pfizer. Like a little puppy, eager to please her master Pfizer. So ambitious and so eager to get ahead and look important by appearing in front of that committee and so lacking any serious responsibility towards the millions of Israelis whose health she neglected. And she not only betrayed the trust of the Israeli public, but by her distorted testimony she influenced the FDA committee, thus exposing billions of people around the world to the dangers of this vaccine, because an FDA approval goes a long way around the world. She not only should be fired. She should go to jail!

So now all the people in the US have at least one scapegoat to blame for everything. I've

been told that the US relied on the Israeli's for safety monitoring due to the sad state of safety monitoring in the US. They may not have realized that Israel was even worse than the US in safety monitoring; much worse.

18 USC 1001 violation by Dr. Sharon Alroy-Preis

It is a criminal violation of US law for anyone to make a material misrepresentation in any official proceeding ([18 USC 1001](#)). Violators are subject to 5 years in prison.

Consider the following statements made at [this FDA VRBPAC meeting](#) on September 17, 2021:

uh pre-waning effect um I I have to say that I
was pretty

5:57:22

surprised with Reckless Levy uh comment that
Israel doesn't uh follow Adverse

5:57:27

Events it's our data I'm in charge of it so I know
exactly what is being reported to

5:57:33

us and I set our reservation but we actually
have two very large studies from our biggest
hmos that covers 75

5:57:39

“Reckless Levy” is actually “Retsef Levi.” But this statement was made at a time where there was no safety monitoring being done by the Israeli government.

She is relating to Retsef's claim that the reporting system in Israel was dysfunctional (which it was) and that there was no follow up or monitoring on AEs. Retsef didn't lie. She did. She said she was “surprised.”

So this appears to be a deliberate misrepresentation made by Dr. Alroy-Preis which could subject her to criminal prosecution by the DOJ. However, such things are unlikely even though her testimony led the committee to approve the vaccines which have killed hundreds of thousands of Americans.

On the other hand, maybe she was surprised that anyone outside the MoH knew what was really going on (so she wasn't lying).

How do “they” explain this away? They can't!

The Twitter trolls initially claimed the videos were taken out of context. But that didn't

last long. Now they are silent. The strategy seems to be let's ignore it so it will go away.

How medical experts in the US are reacting

I have the mobile phone number for Dr. Grace Lee, head of the ACIP committee which is the outside committee of the CDC. So I texted her this article and asked for comments.

If she says anything, I'll report it here. Don't hold your breath.

She should be outraged. But she won't be. She'll say nothing. She'll just go along with what she is told to do, which is to ignore it. That's how science works. If you want evidence of corruption, this is it.

Similarly, no member of the mainstream medical community will say a word. None of them will say anything.

Will Professor Vinay Prasad say anything? He knows about this article and I've asked for his comments as well.

This is a defining moment for the world mainstream medical community and medical journals. Will they speak out or do as they are told and remain silent? Who will be the first to speak out?

I'm guessing they will all remain silent and not comment about this. This shows you the level of control and corruption.

Here is a partial list of people I've ask for comment from:

1. Marc Tessier-Lavigne, President of Stanford
2. Stanford Dean of Medicine Lloyd Minor

3. Stanford Professor David Relman
4. Stanford Professor Grace Lee (who is also head of the ACIP committee)
5. Stanford Professor Bonnie Maldonado
6. UCSF Dean of Medicine Bob Wachter
7. UCSF Professor Vinay Prasad
8. Emory Dean of Medicine Vikas Sukhatme
9. Emory Professor Carlos del Rio
10. John Hopkins Professor Bert Vogelstein (the most cited scientist in history)
11. CNN Medical Expert Dr. Sanjay Gupta

I know all of these people. I am hoping that at least one of them will want to be on the right side of history here in calling out the corruption at the MoH.

But no.

The only person who responded was Bert Vogelstein who basically said he's working on something big and didn't want to get defocused. That's fair. He's a class act. This is peripheral for him and I knew that when I reached out.

Let me make my position crystal clear:

Scientific corruption like this should never be tolerated and those that refuse to speak out publicly about it should be ashamed of themselves.

I would have asked other people but many top scientists in the infectious disease area requested I never contact them again after I first revealed the COVID vaccines were unsafe back in May, 2021. They believed I was a menace to society at the time (and probably still do).

This can't happen in the US because the CDC avoids gathering accurate safety data on vaccines

The US has a lame system for tracking adverse events after vaccination. They looked at upgrading it over 10 years ago, but the new system, ESP:VAERS, was too accurate and showed all the US vaccines were dangerous. So the CDC canned the system. This is

documented near the beginning of RFK Jr's book [The Real Anthony Fauci](#).

The CDC would never commission a study to accurately study adverse events so the problem just doesn't happen in the US because they avoid collecting the data in the first place.

This is very corrupt but nobody minds including the mainstream medical community. They have all been brainwashed into believing the FDA is legit and all vaccines are safe. But apparently they know this isn't true because none of them will debate RFK Jr on vaccine safety (he's been trying for 20 years to find an expert to debate (Alan Dershowitz doesn't count).

Of course, the US Pfizer vaccines are just as dangerous as the Pfizer vaccine in Israel, but the governments and the mainstream press ensure nobody finds out, just like how you will only see this information on Substack and in other places, but never in the mainstream press.

Even when an [FAA whistleblower comes forward with serious accusations that are irrefutable](#), the US press avoids covering the event:

Today, nobody will challenge the FDA. They now do EUA approvals without any proof of a clinical benefit and without approval by their own captured outside committee. This is outrageous, yet doctors are silent.

The FDA just approved the combined booster after testing on 8 mice showed that the [Omicron protection was sporadic](#) and [that it did not prevent infection in a single mouse that was challenged with the virus](#). No word on data showing there is a hospitalization or death benefit.

What I don't understand is why they didn't do the Omicron challenge study on 200 mice: 100 who got the full vax series vs. 100 completely unvaxed mice looking for all-cause mortality and morbidity. That would have been real data, far better than 8 mice who got the vaccine looking for antibodies. But they didn't do this because they knew it would be bad.

Instead, the medical community and the FDA are content with a single arm study with 8

mice which showed no clinical benefit from the vaccine to approve a vaccine that they will try to get everyone to take.

This is truly stunning. It shows you clearly how broken the medical community is. There should be op-eds in every medical journal on the absurdity of approving a booster with no clinical benefit in humans or mice. Doctors should be outraged at this. But they say nothing.

All the mice used in the study are now dead (they were killed as part of the study which was convenient since that way they can't track their mortality).

Was Sharon Alroy-Preis in on it?

It is highly unlikely that Dr. Sharon Alroy-Preis, the Health Ministry's head of public services and a top COVID adviser to the Israeli government, didn't know about all of this before the press leak.

How could she not know? There was no safety monitoring in place before December 2021. If she didn't know that, she should be immediately fired for incompetence. So she must have known about the data that was being gathered and that it was being analyzed. She should have been on pins and needles waiting for the result of the meeting if she truly cared about public health. And how could she not be at that meeting with the scientists? What could possibly be more important to the health and safety of the Israeli people? Where was she?

Even though she obviously didn't make the Zoom meeting because she had more important things to do, she would have been notified immediately after the meeting by her staff. That's the 99.99% most likely scenario.

But once it was announced in the press, it removed all doubt.

If she was truly not informed before the GB News story on August 20, she would have immediately issued a press release that she was never told about the report and that there would be an investigation. Instead, we heard nothing. The only possible way that could happen is she was in on the cover up.

Summary and recommendations

In writing this article, I have spoken privately to both MIT Professor Retsef Levy and Dr. Yaffa Shir-Raz to make sure I got everything right.

Write a comment...

authority is calling for an investigation.

2. More importantly, it's now crystal clear from the preliminary examination of the global behavior, really strange and dark times, I have been wondering why more has been coming out of Israel. Since they were so all in, world government is interested in analyzing the Israel safety data.

3. Nobody is calling out what happened in Israel as being wrong. That's stunning.

1. Nobody prominent is speaking out!

4. Nobody has asked to see the expert panel report of the underlying data. That's really stunning. Palestinians got off easy because Israel really didn't care to make the vaccine obtainable for them, I wonder if once they found out it killed people they suddenly wanted to make sure Palestinians got the vax?

5. The report is only the tip of the iceberg here since only five adverse event types were analyzed. <https://www.doctorswithoutborders.org/latest/palestinians-left-out-israels-covid-19-vaccination-success-story>

The Israeli people should be demanding that Sharon Alroy-Preis resign now as well as all the members of her team who participated in the cover-up. They should be prosecuting all these people as criminals because that's what they did: they conspired to

bury the safety information which could have saved lives.

It is important that honesty and integrity be restored at the MoH as soon as possible, yet nothing is happening.

So the corruption will continue worldwide.

Please share this widely. It is important for this information to get out. Now.
