

Will physicians EVER speak out?

Or will they continue to shrug their shoulders and refuse to look at the data showing that these vaccines are the biggest scandal in medical history?

@BrianLenzkes

We are past the point of being able to shrug our shoulders and say "That is strange" to ourselves and walk on.

Please share- 3 physicians at the Mississauga hospitals have died this week. 1st memo Monday, 2nd Tuesday, 3rd Thursday. Cause of death wasn't shared in the memo, but how many times have 3 doctors died in 1 week, days after the hospital started administering the 4th shot to staff. This is in addition to the physician who worked at north York general who died this week while out running. How many more "coincidences" will people accept. These shots need to be pulled 💔

The deaths:

MEMO

SUBJECT: Memorial Notice – Dr. Jakub Sawicki	DATE: July 21, 2022
FROM: Dr. Thomas Short, Program Chief and Medical Director, Surgery Karen Conway, Director, Surgery Program and Peri-Operative Services,	DEPT: Medical Affairs
TO: All Staff, Professional Staff, Volunteers and Learners	

It is with great sadness that we share the news of Dr. Jakub Sawicki's passing.

Dr. Sawicki completed his training at the Credit Valley Family Medicine Teaching Unit in 2013 and has been a member of the Surgical Assisting team at Trillium Health Partners since 2014.

After completing the program, Dr. Sawicki continued to be involved in teaching family medicine residents at THP. Following his graduation, Dr. Sawicki developed a passion for pain medicine and went on to conduct research in this area. He also became the Medical Director of pain medicine clinics within the region.

Dr. Sawicki was a kind and pleasant person, and he will always be remembered for having a...
...a... and his patients would open up to his warmth

MEMO

<p>SUBJECT: Dr. Lorne Segall</p> <p>FROM: Dr. Thomas Short, Chief and Medical Director, Surgery Program</p> <p>Karen Conway, Director, Surgery Program and Peri-Operative Services, Trillium Health Partners</p> <p>TO: All Staff, Professional Staff, Volunteers and Learners</p>	<p>DATE: July 18, 2022</p> <p>DEPT: Medical Affairs Department</p> <p>CC:</p>
---	--

It is with heartfelt sorrow that we share the news of Dr. Lorne Segall's passing on Sunday, July 17, 2022.

Dr. Segall joined Trillium Health Partners in 2007 as an Otolaryngologist at Credit Valley Hospital and served as Division Head of Otolaryngology from 2016 to 2017. His generous contributions and support to Trillium Health Partners' Otolaryngology services played a pivotal role in the success of our Otolaryngology Program.

Dr. Segall was an outstanding and compassionate clinician, and quality patient-centred care was at the centre of Dr. Segall's focus.

Always the consummate gentleman and an all-around great person, he truly embodied the spirit of teamwork. Dr. Segall is survived by his wife and three children.

Stickybeak Writes The Thunder From Downunder · 12 hr ago DEPT: Medical Affairs

Since the roll out of the Covid shots, I've spoken to four GPs and one paediatrician here in Melbourne Australia, the first meeting being in November last year (I wrote about here) with a GP who treated Covid patients in hospital. He confirmed there was different treatment (Sotrovimab/ Remdesivir) according to vax status.

It was clear that none of these physicians had read the data from the original clinical trials. When asked if she supported Covid shots for children, the paediatrician said, "Obviously, being a doctor I would". She knew none of the data from the original adult or children's trials in the mRNA drugs. Simple facts I told her clearly came as a surprise.

I've seen three different GPs in my primary care practice for various reasons and each time I brought up the Covid shots. I told them I suspected some of the incidences of people dropping dead from myocarditis after a short illness reported by Queensland Chief Health Officer Dr. John Gerrard could be MIS with high troponin levels. I told them I thought there was a signal for this. If they looked in the supplementary appendix of the Pfizer trial, there's a death from sepsis.

In a more recent meeting, I told the GP it begged belief that these drugs are still being dolled out that are killing more people than they're saving . I referred to all cause mortality statistics released earlier this year and told her you could see the rise from when the shots were introduced in April 2021 and a spike in September (when they were mandated here.)

Dates of death: July 17, 18, 20.

None of these physicians denied anything I said. The only one who said anything in support of them was the one treating Covid patients and his reason for doing so was that he trusted they gave 99.9% of the experts. When I asked him to name them, he couldn't. All three at Trillium Health in Mississauga, Ontario, Canada

meat smith of the vax
 Shrug & move on.? Same in NZ
 Just bad luck? Or related to the vaccine? What do you think?
