

Dr. Masaru Emoto and Water Consciousness

March 23, 2017(<https://thewellnessenterprise.com/2017/03/23/>)

Dr. Emoto was a pioneer in the study of water. His work demonstrated that water is shaped by environment, thoughts and emotions.

Who Was Dr. Masaru Emoto?

Dr. Masaru Emoto, the Japanese scientist who revolutionized the idea that our thoughts and intentions impact the physical realm, is one of the most important water researchers the world has known. For over 20 years until he passed away in 2014, he studied the scientific evidence of how the molecular structure in water transforms when it is exposed to human words, thoughts, sounds and intentions.

The Hidden Messages in Water

The extraordinary life work of Dr. Emoto is documented in the New York Times Bestseller, [The Hidden Messages in Water \(https://amzn.to/3gpM12z\)](https://amzn.to/3gpM12z). In his book, Dr. Emoto demonstrates how water exposed to loving, benevolent, and compassionate human intention results in aesthetically pleasing physical molecular formations in the water while water exposed to fearful and discordant human intentions results in disconnected, disfigured, and "unpleasant" physical molecular formations. He did this through Magnetic Resonance Analysis technology and high-speed photographs.

See the following water crystal photographs from Dr. Emoto's work. Each water crystal you see was exposed to the word it has written next to it prior to being photographed:

Love and Gratitude

You Disgust Me

Eternal

Peace

Evil

Thank You

His research also showed us how polluted and toxic water, when exposed to prayer and intention can be altered and restored to beautifully formed geometric crystals found in clean, healthy water. The following photos are images of photographs of the the water in the Fujiwara Dam before and after the Reverend Kato Hoki, chief priest of Jyuhouin Temple, offered an hour long prayer over it.

Water Crystal Before Buddhist Prayer at Fujiwara Dam

Water Crystal After Buddhist Prayer at Fujiwara Dam

How Music Affects Water?

Dr. Emoto also studied how sound affects water. The Emoto music studies demonstrate how certain types of sound, like classical music, generate beautiful crystalline patterns, while heavy metal music, generate ugly and distorted crystalline formations. In the images below you see the crystalline formation resulting from water being exposed to *Mozart's Symphony No. 40* and then in contrast what the water crystal image looks like after listening to heavy metal music.

Symphony No. 40 Mozart

Heavy Metal

Dr. Masaru Emoto put Water as a Living Consciousness on the map for the scientific world. He showed us how water is an energy capable of more than we ever imagined. The power human thoughts, sounds and intentions has to strengthen and disempower is one of the greatest discoveries of our time.

His work has us question, if water is affected by the words, intentions, and energies, what about human beings, who are made of mostly water? If we transform the water and thoughts we are made of, what else is possible?

There are legions of scientists who have built upon the breakthroughs of Dr. Emoto and are offering practical technologies for everyday life. One such example who we find particularly inspiring is the Austrian Engineer Bernard Ratheiser. Since 1994, he has developed devices that restructure water molecules and assist water in being its highest vibration as living energy.

Water Crystals and Structured Water

With vortexing and sacred geometry along with nature's energies through precious stones, Bernhard Ratheiser has created a way for water to be revitalized when it passes through one of his water structuring devices. Every measurement in his beautiful devices is designed to evoke the energy of the cosmos and realign water with the energy of creation.

When water passes through his UMH Devices, everything life supporting in the water is enhanced, energy increases, memory is erased, and toxins are energetically neutralized. The following are actual photos of water that passed through the UMH device using the Emoto Protocol and demonstrates how inherent spring water quality is restored. You can see how the water crystal photos before and after passing through the UMH Master whole house device result in a significant improvement in crystalline structure.

Another of our collections, VitaJuwel, asked the [Hadolife Laboratories \(http://www.hado-life.com\)](http://www.hado-life.com) in Austria, which was co-founded by Dr. Masaru Emoto and his oldest student to take microscopic photos of water before and after it had been treated with VitaJuwel. You can see the stunning result below that's an example of the crystalline structure you'll be drinking in the water you can charge in the [VitaJuwel Wellness bottl \(/product/vitajuwel-wellness-gem-water-bottle/\)](#)e found at The Wellness Enterprise.

We live in exciting times when new technologies like water structuring devices are making it easy for us to access water's highest vibration. Our understanding of the natural world is moving to new levels as technology embraces the truth of [structured water science \(/scientificminds/\)](#) with sacred geometry, vortexing, and gemstones.

Dr. Zach Bush: Water and Memory

Thanks to how Dr. Masaru Emoto's work opened the door to understanding water and memory, many doctors, scientists and researchers have made exciting new discoveries. One of those doctors is [triple board certified M.D. Zach Bush. \(https://thewellnessenterprise.com/evidence-hydration-epidemic/\)](https://thewellnessenterprise.com/evidence-hydration-epidemic/) In the following video, Zach Bush shares that there is no part of the human brain that holds long term memory, but there is, however, evidence that memory is held elsewhere. Watch the video below to hear what he has to say about where and how and how memory is held in the human body.
