Warning

Media and readers of my articles about [atomic bombs](#) 1945, [moon trips](#) 1969, [M/S Estonia ferry incident](#) 1994 and [911 tower top down terrorist collapses](#) 2001 are warned. You probably suffer from [cognitive dissonance](#) and cannot handle my information without getting mentally disturbed with serious consequences.

My **proven** facts are simple and correct and good news. A-bombs do not work. **Humans cannot travel to the Moon.** M/S Estonia didn't lose her bow visor. **Skyscrapers do not collapse from top down.** All information to the contrary is [pseudoscience](#), propaganda lies or fantasies promoted by **media** and taught at **universities**. And if you do not agree with the official lies, you will not be allowed at the university boat race* and other silly events, etc. Your position in society is at risk.

If you suffer from [cognitive dissonance](#), you no doubt find my info disturbing and get upset, angry, anxious or worried. What to believe and write? Old lies or truth?

Media incl. newspaper chief editors are kindly requested to get psychological assistance to get rid of their [cognitive dissonance](#). Why not cure yourself? And publish the result as a scoop.

SEC. 1021. AFFIRMATION OF AUTHORITY OF THE ARMED FORCES OF THE UNITED STATES TO DETAIN COVERED PERSONS PURSUANT TO THE AUTHORIZATION FOR USE OF MILITARY FORCE.

(a) IN GENERAL.- Congress affirms that the authority of the President to use all necessary and appropriate force pursuant to the Authorization for Use of Military Force (Public Law 107-40; 50 U.S.C. 1541 note) includes the authority for the Armed Forces of the United States to detain covered persons (as defined in subsection (b)) pending disposition under the law of war.

(b) COVERED PERSONS. - A covered person under this section is any person as follows:

(1) A person who planned, authorized, committed, or aided [the terrorist attacks that occurred on September 11, 2001](#), or harbored those responsible for those attacks.

(2) A person who was a part of or substantially supported al-Qaeda, the Taliban, or associated forces that are engaged in hostilities against the United States or its coalition partners, including any person who has committed a belligerent act or has directly supported such hostilities in aid of such enemy forces.

[National Defense Authorization Act for Fiscal Year 2012](#)

It would appear Prof. Bazant and others mentioned below are covered persons to be detained as per above US law as they suggest and support the false idea that flying planes into weak tops of towers will cause the structural destruction of the strong bottoms of the towers. You wonder why they are still at large. Is the President or military sleeping? Like the FBI? I will explain more at the [Engineering Mechanics Institute conference at Evanston](#), IL, USA, early August, 2013

Like all the great religions of the past, The **Nutwork** presents a choice to us all: believe our stories or live in doubt. While their stories seem rather silly to us, they give feelings of security and purpose to others. These stories are the gospel of the religion of normality, if you will. You cannot be normal if you don't believe in this gospel. You cannot function in society like your friends and family if you don't believe in this gospel. You can't just stop believing in the gospel of normality, because doing so would mean you have to find different answers to all the questions the gospel answered before. The gospel covers a massive emptiness in people. I can understand why people refuse to question it.

[More silly stories!](#)

11 September 2021 it was twenty years since **US** terrorists destroyed the complete **WTC-complex** at New York *'live on (faked) TV'* and blamed it, without evidence, on another party - Usama Bin Laden and al-Qaeda - some Arabs hiding in a cave somewhere.

7 October 2001, the **US Global War On Terror** started and is still on with millions killed. The US terrorists, apart from now having lost the **War On Terror** overlooked one important matter:

No structure or tower can be destroyed by gravity from above initiated by local structural failures up top caused, e.g. by a plane and fire.

Photo by Thomas Nilsson - **The above initiation of the destruction of WTC2 on 911, i.e. top part tilting and dropping, smoke and debris being ejected, etc., is not possible because structures cannot break down like that ... by gravity. The photo, incl. tree in front, building right, smoke glued to a tilting top in center, etc, is a fake (produced in Hollywood). [Thomas Nilsson should be detained as a covered person!](#)**

It is further explained at 1.18.50 in **DVD2** - a film about the 911 incident. In order to fool the public the **US** terrorists asked (1) Hollywood to produce a movie showing the WTC towers being **stricken by planes** and **collapsing** (sic) **progressively by gravity** from top down, etc, that the **US** terrorists then (2) broadcasted *'live on TV'* assisted by **US** media. As the rubble would reveal how the towers really were destroyed the area was fenced off and faked pictures of the rubble itself were also made and published. Many persons get very upset of the thought that *all* footage of the 9/11 NY WTC destructions are fake. **These persons must like the Anders Björkman Challenge!**

The Federal Bureau of Investigation, FBI, is also supporting the US terrorists and will not, after several contacts, review the below information. I have asked them several times.

In the decade since the 9/11 attacks, the **FBI's intelligence program** has tripled in size, and FBI analysts work around the world - from the war zone in Afghanistan to the White House Situation Room - covering up the Truth about 911.

However, a simple fact remains:

I. Crush-Down Phase II. Crush-Up Phase

<http://www.nistreview.org/WTC-PROGRESSIVE-COLLAPSE-BAZANT.pdf>

Progressive collapse takes place when a light and weak top part C of any structure crushes down the the stronger and bigger bottom part A into dust B by gravity alone. The dust B then crushes up top part C. It happens only in the USA though!

The above picture has been made by a scientist suggesting weak tops of any structure crushes the bottoms of same structure keeping the tops up. This person should be detained as a covered person!

No structure or tower can be destroyed by gravity from top down initiated by local structural failures up top, i.e. that the weak top crushes the strong bottom.

The FBI has miserably failed the [Anders Björkman Challenge 1](#).

[Dave Thomas of NMSR](#), Albuquerque, NM, a dull desert town which looks bankrupt, thought he could win the **Challenge** after I made a [presentation](#) there but failed completely and miserably. **Dave** thinks that dropping one bag **C** of rice on a kitchen scale (WTC) or on 9 bags **A** of rice will crush the scale (WTC) or the 9 bags **A** of rice, while the bag **C**, evidently, just bounced on the scale or on the 9 bags **A**, because the scale or **A** applied exactly the same **impact force** on the bag **C** of rice that the bag **C** of rice applied on the scale or **A**, when **impact contact** occurred.

Dave does not understand that the **impact force** is of very short duration and the **energy** content is only that of the released potential energy that cannot even buckle the top of a kitchen scale or demolish a grain of rice in a bag of rice.

What happens is that the **impact force** is transmitted to ground, while the scale/structure in between is elastically compressed. An identical **impact force** is applied to the moving top (or bag of rice) that is likewise elastically compressed (actually friction between the rice corns absorbs all the energy) during the short duration of the impact.

Dave shows in the second part of his paper an animation of one WTC tower destruction, where the tower itself is erased manually and smoke and debris are added - it look like a fountain. It is a simple trick film prepared in advance to be broadcast *live on TV* to **brainwash** the US population that believes anything shown on TV. The towers were in the meantime destroyed from bottom up.

Try to crush a kitchen scale (WTC) with the top of another kitchen scale (WTC) to start with ... and note that the top just bounces off the scale, as expected, unless the scale crushes the little top of the scale at impact.

I have asked **Dave** several times to drop a bag **C** of rice on 9 bags **A** of rice to destroy the nine bags **A** of rice and invite **media** to have a look but ... [John Geohegan also of NMSR](#) thinks one mass impacting one, two, three masses attached to a rod is the solution but forgets that the rod and the masses remain intact. Only some tooth picks broke.

The [Anders Björkman Challenge 1](#) has been open since **March 2010** and there is still - **September 2020** - 126 months and >80.000+ downloads of this page later - no successful **Challenger/structure!**

The prize is **€ 1 000 000:-**. Come on terrorists and salary slaves! And why not US President D. Trump himself.

Show that you are really smart and and competent can destroy strong skyscrapers' bottoms and similar structures by flying light aluminium planes into the weak tops of steel and concrete. Do not try to fool me with fake animations *'live on TV'*! And do not tell me that USA (**1st May 2011**) killed a man that did it 9+ years ago! Prove it in a legal court and do not kill people without trial. Both Obama and Osama have failed the **Anders Björkman Challenge 1!** The **US** terrorists are still free and around in USA to attack again. While FBI sleeps.

The [911-report](#) and the [CIA Torture report](#) written by members of the U.S. Congress can be read free of charge on the net. I review the reports [here](#) where you also can download the reports. Interesting reading. One President of the U.S. encouraged the CIA to use torture to find out how terrorists are brainwashed and another President of the U.S. ordered the terrorist to be murdered!
