

Measles deaths 1901 to vaccination

[\[back\] Measles stats](#) [\[back\] Measles Statistics](#) [MMR](#) [MMR Urabe](#)

Measles deaths declined by 99.4% before vaccination.

"There are some easy figures which the simplest must understand, but the astutest cannot wriggle out of." --Disraeli ([ref](#))

[Measles deaths (from 1901/2, averaged) declined by 99.4% before vaccination in 1968! This proves vaccination played no part in the decline, yet parents are meant to believe (as shown by the Dr Siegal quote below) that vaccination was the ONLY factor.]

[The big measles lie] "It (measles) is ONLY not a big killer in the United States because of the MMR vaccine."---[Dr Marc Siegal](#). ([Feb 3, 2010 Fox News](#))

(Source: Twentieth Century Mortality CD, Office of National Statistics, 1 Drummond Gate, SW1, UK--0207 233 9233 02075335243. ICD classifications are done by the World Health Organisation)

"The measles death decline graph provided shows that the measles vaccine had nothing to do with the decline in deaths, and has not affected the number of children hospitalised during epidemic years since its introduction."----[MEASLES : THE REAL FACTS----](#)
[HILARY BUTLER](#)

Vaccination against measles was introduced in 1968 but abandoned because of lack of effectiveness and unpleasant side effects. A new, more potent, live vaccine was introduced in 1974 and is now being given to about 50 per cent of children aged 1-2. [Whooping Cough vaccination--Prof Gordon Stewart \(1980\)](#)

VACCINATION: LESSONS FROM HISTORY

THE DIABOLICAL MMR VACCINE: LESSON #1

“There are some easy figures which the simplest must understand, but the astutest cannot wriggle out of.” ~ Disraeli

Measles deaths, England & Wales (from 1901/2, averaged) declined by 99.4% before vaccination in 1968 (which is why they start their graphs from the 1950s). This one statistic, in itself, destroys Measles (MMR) vaccination.

Remember ~ Vaccination takes many lives, and never saved one single life. WHALE.TO

Vaccine fact.

knowledge is POWER

As of 1900, the number of people who died from Measles was 13.3 in 100,000. In 1940 it had declined to 0.5 in 100,000, and by 1960 the mortality rate declined to as low as 0.2 in 100,000. In what year was the Measles vaccine introduced in the U.S.?

THE VACCINE WAS INTRODUCED
IN 1963.
